## COURSE DESCRIPTIONS

**Art (SS7805)** - Do you want to learn how to think and work like an artist? This choice-based art class will spark your creativity as you learn the artistic process, explore a wide variety of art media, and create some amazing original artworks!

**Broadway Bound (7811)** - Are you a star and ready to shine on stage? Don't let the summer get in the way of sharpening your acting skills! This class will give you the opportunity to continue your practice with creative warm-ups, games, and drama activities. At the end of summer school, we will show off your talent with a spectacular performance. **Session 1 only**

**Computer Skills (SS7801)** - This introductory summer experience gives students the opportunity to create Microsoft documents, using PowerPoint, Word, Excel, and Publisher. Your student will be engaged in project-based learning with teacher guided research.

**Discover: Science Labs (SS7802)** - This course is a project-based, hands-on class that will explore the major concepts of Earth Science. Activities will include making models of earth, researching, and identifying Missouri rocks, minerals, and geodes, searching for fossils, digging for dinosaurs, building earthquake proof structures, looking at human impact and trying to clean up an oil spill, weather basics, making a model the zones of the ocean, making a model of the solar system, and more!

**Drones/Robotics (SS7812)** - Are you ready to take off? If engineering, programming, and aviation interest you then this is the class for you. Future careers using drone technology are growing drastically. In this class we will engineer our own drone remotes, learn the basics of drone flight, learn how to program automatic flights, and improve your real-world drone flying skills using a simulator that also teaches Federal Aviation Administration laws and regulations. Regarding Robotics, students use the VEX Robotics® platform to design, build, and program real-world objects such as traffic lights, toll booths, and robotic arms. **Session 2 only**

**Foods (7803)** - This exciting family and consumer science (FACS) class will focus on basic culinary skills and nutrition. Students will learn about various types of foods and then prepare food around the week's theme.

**Exploring Spanish (SS7806)** - Exploring Spanish introduces students to the target language and its culture. Students will learn beginning skills in listening, speaking, reading, and writing. Also, culture, connections, comparisons, and communities are included in this class.

**Lifetime Fitness (SS7807)** - This course is designed to enhance personal and social skills in the context of individual and dual activities. Students will learn skill development, organizational and maintenance principles, and competition strategies as well as rules, etiquette and history associated with individual and dual sports such as disc golf, pickle ball, badminton, and various recreational/yard games. Teamwork, sportsmanship, and safety are emphasized. **Session 1 only**

**Video Production (6783)** - This summer class is for the students that want to further develop their video production skills. We will create various types of visual media by exploring advanced techniques in cinematography and video editing. Previous experience with video editing software is HIGHLY encouraged. **Session 2 only**
